

How will my child be rewarded for their progress?

- At Smestow Academy we actively encourage and reward students for their effort and progress on Sparx Maths.
- Every week the completion rate for each form is shared and celebrated. Form tutors engage with their forms and a trophy for the best performing form is awarded every half term.
- The house with the best completion rate each week wins 100 house points.
- A maths class of the week is also rewarded with a certificate for the class with the highest XP per pupil each week.
- Each week a Student of the week is selected for each year group, at random, from pupils who complete optional homework tasks. This student receives house points and a certificate.

Sparx Maths

How will my child be rewarded for their progress?

- Sparx Maths has a level system. Each level is worth 10,000 XP. Pupils who level up are rewarded with house points and receive a certificate. These pupils will be celebrated on school social media channels.
- All celebrations of Sparx maths can be found weekly on the Sparx Maths display board in the maths corridor.
